

1. Overview

The Vancouver City FC has been facing a decline in revenue across three pillars: Stadium operations, Fanbase engagement, and Merchandise sales, as well as issues engaging international audiences. We aim to optimize these sources of revenue to modernize Vancouver City FC's business model.

- **Project:** Vancouver City FC Revenue Insight
- **Source:** Bolt Case Package
- **Date Range:** Dec. 2023 - Dec. 2024

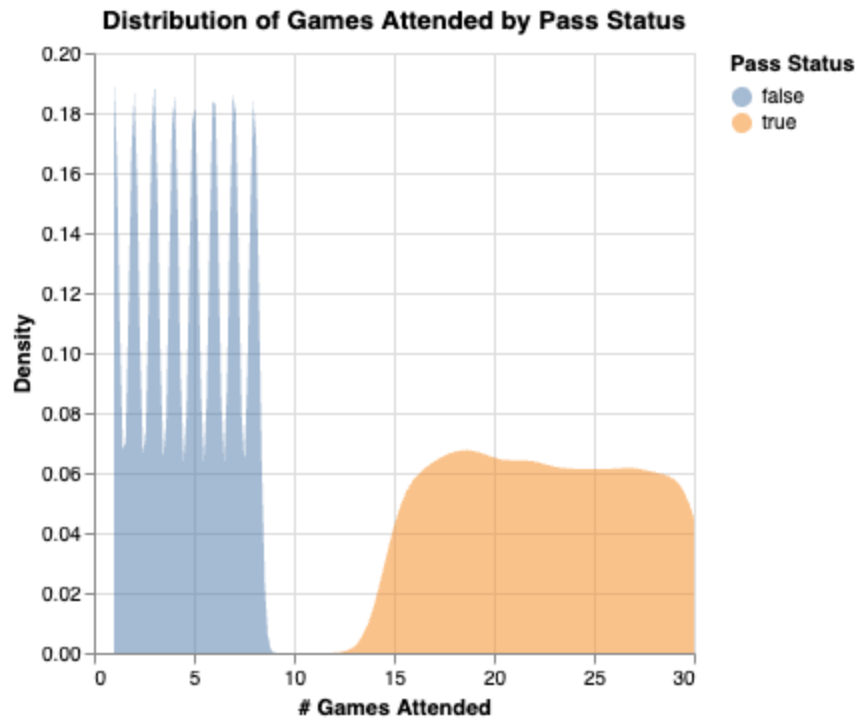

2. Data Sources

Source Name	Description	Format
fanbase_clean.csv	Member profiles and demographics	CSV
cleaned_merch.csv	Purchase history and item categories	CSV
clean_stadium.csv	Stadium operations incl. revenue sources	CSV
merch_fanbase_merged.csv	Merged file of merch and fanbase info (Outer, on Member ID)	CSV

3. Data Dictionary

Fanbase Engagement (fanbase_clean.csv) 70000 records

Column Name	Type	Description
Member_ID	integer	Unique membership identifier (ID)
Customer_Age_Group	string (Ordinal)	Age bracket
Customer_Region	string (Categorical)	Country or broader region the member is from
Seasonal_Pass	boolean	Whether customer holds a seasonal pass
Games_Attended	integer	Number of games attended

Binary behaviour of number of games attended when grouped by season pass holder status

Stadium Operations(`clean_stadium.csv`) 144 records

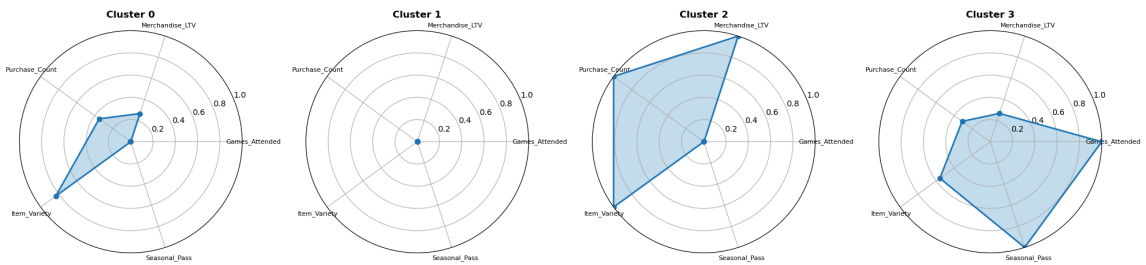

Column Name	Type	Description
Month	integer (Ordinal)	The month within the 2024 Calendar Year
Revenue	integer	Revenue amount generated by assigned source during that month
Source	string (Categorical)	Specific source of revenue or cost

Merchandise Purchase (`cleaned_merch.csv`) 67877 records

Column Name	Type	Description
Product_ID	Integer (Categorical)	Unique product identifier
Barcode	Integer	The barcode (e.g., UPC/EAN) associated with the exact SKU sold to an individual customer; this is the number scanned at checkout.
Item_Category	Categorical	Type of merchandise
Item_Name	Categorical	Specific item name

Column Name	Type	Description
Size	Categorical	Item size
Unit_Price	Integer (Ordinal)	Price per unit (CAD)
Customer_Age_Group	Categorical	Estimated age bracket of customer, may differ from purchaser age
Customer_Region	Categorical	Domestic vs international
Promotion	Boolean	Indicates whether a specific promotional campaign led to the purchase. If the customer engaged with a tracked promotion (e.g., clicked an ad) and then purchased, this is TRUE; otherwise, it is FALSE.
Channel	Categorical	Sales channel
Selling_Date	Date	Date and time of transaction
Arrival_Date	Date	For online orders, the date and time the product was delivered to the customer. This field is left blank (or NA) for in-store purchases
